

Austin Independent School District

Department of Construction Management

May 7, 2012

RE: Jasmine Engineering, Inc.
115 East Travis
Suite 1020
San Antonio, Texas 78205

To Whom It May Concern:

Jasmine Engineering has worked in various capacities for the Austin Independent School District for over twenty years, and has always provided quality services, performed with the highest level of professionalism.

Between 1983 and 2008, AISD has been engaged in five capital improvements school bond programs totaling \$1.1 billion in facilities construction and improvements, and is currently in the process of completing a \$519 million bond program that was initiated in 2004 and a \$343 million program initiated in 2008. Jasmine Engineering has provided professional services to AISD in one capacity or another for the majority of these programs.

In the past, Jasmine Engineering has performed as both a prime and sub-consultant to AISD, providing a full range of engineering services. During the \$369 million 1996 Bond Program, Jasmine Engineering was also a member of one of the construction management teams that provided construction manager-at-risk services to the District for several projects in that program.

Most recently, as a quality control measure in support of the 2004 and 2008 bond programs, Jasmine Engineering has been selected by AISD to provide pre-bid, third-party peer reviews of architectural, structural, civil and MEP building systems designs for various projects that include large concentrations of renovation and addition work.

Regardless of whether the service provided has been full-service engineering design, construction management, commissioning, or peer review, Jasmine Engineering has always fully embraced its responsibilities and performed with dedication and expertise for the benefit of AISD.

Sincerely,

Curtis E. Shaw,
Director
