To Whom It May Concern,

As our project, the University of Texas at San Antonio Combined Science Facility Renovations comes to completion. It is my pleasure to recommend Jasmine Engineering who performed comprehensive mechanical, electrical and plumbing Commissioning services directly for the Office of Facilities, Planning and Construction as an Owners Representative.

I found them to be thoroughly organized, knowledgeable and professional in their approach to the Commissioning process. Collectively the staff of Jasmine Engineering and I performed inspections and oversaw the installation, startup and functionality of the Commissioned systems. Jasmine's team was quite flexible to the ever-changing site and operational conditions, facilitated interim and phased testing and was available at any hour to perform equipment startup and testing in order to minimize disruption to the user groups.

Jasmine Engineering demonstrated their knowledge of the building systems and assisted the project team in providing the highest building performance possible. I have absolutely no reservations in recommending Jasmine Engineering as I am certain my project would not have been as successful as it was without their expertise and diligence. Please feel free to contact me at 210-260-1811 or mcoe@utsystem.edu if you would like to discuss their performance further.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael Coe".

Michael Coe

Construction Inspector II, OFPC
