

Harlandale: A family working together to provide a high quality education where all students graduate to become productive and successful citizens for the 21st century.

January 27, 2009

To Whom It May Concern:

Jasmine Engineering, Inc. has successfully facilitated oversight of several construction projects for the Harlandale Independent School District. This firm has served Harlandale Independent School District in the role of program manager, project manager and commissioning agent. The friendly staff has provided services with excellent professionalism, expert counsel and timely assistance.

Harlandale ISD has enjoyed a very cohesive relationship with Ms. Azima and her employees, as we have worked together in partnership to accomplish projects that have come in on time and within or under budget. Financial savings is crucial in meeting the needs of students, and Jasmine Engineering, Inc. has helped this District put children first by providing some services pro bono.

With their vast array of experience and insight for projects, they have overseen a variety of projects throughout the Harlandale District. Their wide range of knowledge, ability to project time-lines proficiently, and their detail to construction requirements has been instrumental in facilitating this District's accountability to our local tax payers on several bond projects. Some projects have been uniquely challenging. Jasmine has risen to the task by helping to find innovative solutions that would not normally be considered within the scope of normal duties..

It is with great pleasure and sincere honor that I present this letter of support for Jasmine Engineering, Inc.

Sincerely,

A handwritten signature in black ink that reads "Robert Jaklich".

Mr. Robert Jaklich
Superintendent
