Subject: Letter of Recommendation
Combined Science Facility Renovations
University of Texas at San Antonio

To Whom It May Concern,

I am pleased to recommend Jasmine Engineering who was the Commissioning Agent for the Combined Science Facility Renovations project at the University of Texas at San Antonio. Jasmine Engineering was hired as an Owner's Representative directly by the University of Texas System Office of Facilities Planning and Construction.

Jasmine Engineering was especially knowledgeable of the project specifications and tracked construction progress and deficiencies. Jasmine Engineering wrote functional performance tests for all equipment including an air handling unit with a heat recovering total energy wheel. In addition Jasmine Engineering ran the commissioning meetings and assisted the contractor in putting together their commissioning plan. Jasmine Engineering was highly valuable in the tracking of equipment installation progress and deficiency resolution. They were also available to meet our schedule for meetings and events.

I highly recommend Jasmine Engineering and hope that we can work together again with their team on a future project.

Sincerely,

Rob McNicol, P.E.
Resident Construction Manager
