WHOM IT MAY CONCERN

As the architect for Harlandale ISD's various projects over the past few years, I am pleased to commend Jasmine Engineering for their Total Building Commissioning professional services. Jasmine Azima's personal involvement and project "teaming" process of architects, engineers, Owner and the project users from the initial programming phase through construction has produced successful projects that were within the time schedule and approved budget. As a result, potential issues are recognized and resolved before construction commences.

The best part, in addition to a successful project, the Owner, the project Oversight Committee and the community are pleased.

We look forward to working with Jasmine Engineering again in the future.

Kenneth Zuschlag, AIA
Principal
