RE: Jasmine Engineering

To Whom It May Concern,

Our firm has provided mechanical, electrical, and plumbing engineering services for two major renovation and addition projects for the Harlandale Independent School District. The projects are renovations and additions at Harlandale High School and Harlandale Middle School. Jasmine Engineering performed program management services for both of these projects on behalf of HISD.

Jasmine Engineering is a very competent group of professionals. They clearly communicated project expectations to the design team through-out design and construction of the projects.

I believe that Jasmine Engineering has the qualifications to provide Program Management and Building Commissioning services for any project.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael O'Shea", written over the word "Sincerely,".

Michael O'Shea
Principal
