Re: SET Recommendation of Jasmine Engineering

To Whom It May Concern:

SET has performed services as a consultant to Harlandale ISD under the Program Manager services of Jasmine Engineering on recent school projects; namely, the stadium synthetic turf replacement and the reconstruction of tennis courts at the District's two high schools. Our experience during these projects is that Jasmine Engineering holds the interests of the District in the highest regard. We are impressed at the level of effort that they put forth to ensure that the District receives top quality work at the very best prices possible. Our observation is that this is true with respect to both engineer/architects and contractors.

We enjoyed our experience working with Jasmine Engineering for Harlandale ISD, and we sincerely hope we will have the opportunity to provide further service on future projects.

Thank you,

SPORTS ENGINEERING TECHNOLOGIES, INC.
